

# Sleep With Me

Sherrié Austin

You say my name like you own it  
You touch my skin like it's yours  
Love's always here when you want it  
But while I'm still holding you  
You're already done the road  
And while I'm still on fire from your last kiss  
The sheets are already cold

I could spend tonight with you  
Make that sweet mistake  
Such an easy thing to do  
When you look at me that way  
But tomorrow you'll be gone  
'Cause we both know you still belong  
To someone else  
And I still have to sleep with me  
And wake up with myself

This so called love  
We've been making  
Is making a fool out of me  
I've always been yours for the taking  
But you stay here long enough  
To have been here long enough for you  
And I'm never strong enough to tell you no  
And you damn well know it too

I still have to sleep with me  
And wake up with myself
