I saw you from the beginning
The night I was revolving around you

All that time, through a long wandering
I can't catch you, you're like air

It's starting to fall down
The wall between you and me
It's like a SHIFT in you and I
What we feel is the same, the two of us

Come closer (Oh)
Show me your heart (Oh)
Just like this, with you (With you)
I want to escape to anywhere tonight

Your eyes are different
There's a special feeling
You and I, have evolved
We know that something's started

I saw you from the beginning
The night I was revolving around you
All that time, through a long wandering
I can't catch you, you're like air

It's starting to fall down
The wall between you and me
It's like a SHIFT in you and I
What we feel is the same, the two of us

Get it together (Oh)
Get it together (Oh)
Run away with me (With me)
The small world between you and me has changed

Let's not hurry
Girl, the choice is up to you (Uh)
Let's not stop
Both of us know what we want Woo
Oh

SHIFT in you and I

It's starting to fall down
The wall between you and me
It's like a SHIFT in you and I
What we feel is the same, the two of us

Show me your heart (Oh)
Just like this, with you (With you)
I want to escape to anywhere tonight
