

# Bambi

## Short Stack

She asked me to breathe, breathe  
Asked me to leave  
Asked me to speak through the holes in my teeth  
Asked me to say what I don't think I'll say  
What I don't think I'll say that it's all underneath

I don't think I believe her  
I hate every word she said  
I think I might just leave her  
I wish I was better dead

It's not as easy as just letting it go  
I think I'll live for or either die for this  
No matter the cause  
I've had some easy come and go, life is taking its toll  
I'm on my sixth straight bottle, spinning out of control  
I think I'll go

Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Well, I think I'll go

I run, run, tell me to run  
Tell me to lie through the holes in my tongue  
Tell me to try to revive this life  
When I despise what I've become

I don't think I believe her  
I hate every word she said  
I think I might just leave her  
I think I'll be left for dead

It's not as easy as just letting it go  
She's like a backseat driver, steering out of control

Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Lately, all of this is taking its toll  
I wish I kissed you goodbye about a million times before  
Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Well, I think I'll go  
And I think I'll go

(1, 2, 3, 4)

Well lately, baby, I've been losing my mind  
So I toss and I turn  
Oh, you've been keeping me up all night

Holy shit this is taking its toll  
I wish I kissed you goodbye about a million times before  
Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Bambi, I can't get you out of my head  
And I don't ever think I wanna, baby  
Well, I think I'll go
