

Ruby Red

Short Stack

From the second floor you seem so far away
And as the raindrops kiss my broken lips, i beg that you would stay
But you know honestly you mean to me the weather
The stage was your last time but this time,
I've found someone better
Ruby Red,
She wants the world instead
Ruby Red,
She wants the world instead

And from the ice caps we could see the sea below
As the waves collided side to side
They swayed us to and fro
But we were wild-eyed like fireflies together
We sunk those chemicals like wolves
And we were flying feathers
Ruby Red,
She wants the world instead
Ruby Red,
She wants the world instead

Singing
Nothings gonna stand in our way
And nothings gonna save the world so come closer
And nothings gonna stop us today
We were the colours, we'll die like colours
So paint me black and blue

And I'll explode into the sky and meet the sun
To place you with the stars above
Cause that's where you belong
Ruby Red,
She wants the world instead
Ruby Red,
She wants the world instead

Singing
Nothings gonna stand in our way
And nothings gonna change the world so come closer
And nothings gonna stop us today
We were the colours, we'll die like colours
So paint me black and blue
So paint me black and blue
So paint me black and blue

Singing
Nothings gonna stand in our way
And nothings gonna save the world so come closer
And nothings gonna stop us today
We were the colours, we'll die like colours
So paint me black and blue
So paint me black and blue
So paint me black and blue
So paint me black and blue
