

Stone to rot, bone to break
Seeing all white on my plate, man
Feeling warm and I want to stay
Feeling warm, I want to stay
Give me a problem, give me a break
Don't know how to communicate
There's nothing for me when I try to stay
Man, there's nothing for me here

Deep in a well, deep in a state
Show me the pedal, show me the break, man
Everyday they changing up those stakes
New border build in front of your face
Reason to kill, reason to make
Time gets heavy and I'm feeling the weight
Feeling the wait, feeling the weight, man

Don't it make you wanna go home?
Don't it make you wanna go home?
Don't it make you wanna go home?
All God's children get weary when they roam
Don't it make you wanna go home?

Things I've done, things I've done follow me
Things I've done, things I've done
Things I've done, things I've done follow me
Things I've done

Things I've done follow me
Stay stuck in my teeth
Smells when I'm talking
Never been one to please
Covered in paint, covered in grease
Covered in hate, covered in streets
Covered in pain, trying to ease
I'm trying to run but it follows me
Stays stuck in my teeth

Everyday stays stuck in my teeth

Things I've done, things I've done follow me
Things I've done, things I've done
Things I've done, things I've done follow me
Things I've done, things I've done
Things I've done, things I've done follow me
Things I've done, things I've done
Things I've done, things I've done follow me
Things I've done, things I've done
Things I've done, things I've done follow me
Things I've done, things I've done
Things I've done, things I've done follow me
Things I've done, things I've done
