

## All We Need

Showtek

Who says it's too late, who says we are done  
Take another shot, pour another one

We already here, we don't need a dream  
We already more than we make it seem  
We all know life don't give no guarantee  
So let's just live, you know what I mean

Old or young love is all you need  
Let's dance like stars up and down the streets  
I'll never forget the words you said to me  
If we've got us, we've got all we need

We've got all we need

Old or young love is all you need  
Let's dance like stars up and down the streets  
I'll never forget the words you said to me  
If we've got us, we've got all we need

Wheels are off the ground, we are safe and sound  
The sun will always shine here above the clouds

We already here, we don't need a dream  
We already more than we make it seem  
We all know life don't give no guarantee  
So let's just live, you know what I mean

Old or young love is all you need  
Let's dance like stars up and down the streets  
I'll never forget the words you said to me  
If we've got us, we've got all we need

We've got all we need

Old or young love is all you need  
Let's dance like stars up and down the streets  
I'll never forget the words you said to me  
If we've got us, we've got all we need
