

Dear Hardstyle

Showtek

Take it back to where it all began
Everybody get your hands up
Everybody
Let's go

Dear hardstyle, my first love, an unexpected one
Comes second to none
A love story, teenage in fact
We never knew where this thing would go
When I was on it, you filled me with hope
It's hard to grow apart when your roots are tied
But all boats lift on a rising tide
We've done more for each other than we could ever imagine
Walking blindly, watching the magic happen
The door's always open
The distance is always worth closing
Thank you for finding me, for finding all of us
And even though it feels like goodbye
This is hardstyle, baby
Our love for you will never die

Take it back to where it all began
Do it over and over again
I never want this moment to end
Let's do it again, let's do it again
Let's do it again
Let's take it back to where it all began

Let's go

Take it back to where it all began
Do it over and over again
I never want this moment to end
Let's do it again

Let's do it again
