

Real One

Showtek

I was lonely until I found you
All alone like I lived on the moon
Black and white the seasons
But you turn them down on me
Oh baby you could be the detox that I need

I wanna dance tonight
And hold you tight
Stop talking to myself
'Cause in a world of robot people
I know that you're the only real one
I wanna fill the void
Escape the noise
Of everybody else
'Cause in a world of robot people
I know that you're the only real one

The real one, the real one
The real one, the real one
I know that you're the only real one

Of robot people

I wanna dance tonight
And hold you tight
Stop talking to myself
'Cause in a world of robot people
I know that you're the only real one

The real one, the real one
The real one, the real one
'Cause in a world of robot people
I know that you're the only real one

I wanna dance tonight
And hold you tight
Stop talking to myself
'Cause in a world of robot people
I know that you're the only real one

The real one, the real one
The real one, the real one
The real one, the real one
I know that you're the only real one
