

Lock and load
Unleash the terror
Blood and gold
Repeat my error

Praise the destroyer
We come to slaughter

Praise the destroyer
How far it goes?

Praise the destroyer
Until your final breath

Dispatch
No one's coming
For you
Dispatch
No one's coming
To save anyone

War dogs will set the world on fire
Just watch it burn

You'll never wash this dirt off your hands
You'll pay for
What you've done

Dreams
To never have to read your mind
Soul
To see even in the darkest nights
Things
No one understands
No one can withstand
It's the fire of god

Make this right
Understand
When you lose my mind
Fade on me!
Make this right
Understand
When I lose my luck
Flames ignite

Let me out
My heart is beating
Torn apart

Take them down
I hear them screaming
Dig deep down
Fire it up

I wanna feel like taking back
I give up, but I pray for

We need to fix it
For myself, for the path
That I craved for

Tell me what you wanted
Tell me what you needed
Because if I don't give a fuck
It might have wrecked
Burn it down!

We should wreck
The fuck down!
Wreh!

Make this right
Understand
When you lose my mind
Fade on me!
Make this right
Understand
When I lose my luck
Flames ignite
