

Holy water wonder wheel
Single revolution got a ticket for two
We'll take The G to paradise
Twenty different flavours but they're nothing on you

Cause this is the real thing, Elysium
A place that people dream about when they decide
To dream a dream, magnificent and concrete
To dream a dream

Forever
Together
Forever
So unafraid of loving you forever, forever

Oh let us take this memory
And treat it like a masterpiece, one we can touch
Cause baby we look beautiful
Stepping over velvet rope together, oh baby

I'm not scared of loving you
You make me feel like sunshine, feel so good

Forever
Together
Forever
So unafraid of loving you forever, forever

See the sun it's falling down
Or will it crash into the ground
Or will it drown under the sea
And leave us in the dark

Forever
Together
Forever
So unafraid of loving you forever, forever

Forever
Forever
So unafraid of loving you forever, love, forever

It's hot out here and there's blue skies
Blue like the tip of our tongues
From the snowcone we shared
With the wind in our hair, we played mini golf
Wondering about the fortune he read
You said, "Is it true?"
