

## wait it out

SHY Martin

It's like you're trapped in the bedroom  
Don't feel like sleeping but I know you're tired  
And I think that you're tired of yourself too  
Your mind's going places and you're getting lost in the

Worst-case scenarios  
Spinning out of control  
Pulling you down  
No words can make it stop  
So we don't have to talk  
Save it for now

We can just lay here and wait it out  
We can just rest for a little while  
Don't have to be anywhere right now  
We can just stay here and wait it out

Trying my best holding on to  
The best side of you, I know you don't remember it now  
But I'm here to remind you  
Whatever is hurting it's not who you are it's just

Worst-case scenarios  
Breaking the best of us  
Letting us down  
I know words can't make it stop  
So we don't have to talk  
Save it for now

We can just lay here and wait it out  
We can just rest for a little while  
Don't have to be anywhere right now  
We can just stay here and wait it out

Watching your thoughts by your side  
Just like clouds when they're passing us by  
I'm gonna wait here 'til you come down

So we can just lay here and wait it out  
We can just rest for a little while  
Don't have to be anywhere right now  
We can just stay here and wait it out
