

## Every Day

## Sick Puppies

Been away so long I don't remember my face  
That's how long it's been  
I'd like to tell you what I'm facing now  
But it ruins everything

Been away so long I don't remember this place  
And I'm feeling scared  
Of course you don't know what I've been going through  
But I'd like to think you care

Everyday is change  
With a different problem to face  
Everybody feels a different type of strange  
But you don't throw it away

Nowadays everybody's trying to be  
The latest real real cool hip thing know what I mean  
Not about you it's how you arrange  
And it doesn't matter that everything's going to change  
Cause you are you and I am me  
We are all in control of our own destiny  
Follow your heart open your mind  
And enjoy your life it only cums one time

Everyday is change  
With a different problem to face  
Everybody feels a different type of strange  
But you don't throw it away

Everyday is change  
With a different problem to face  
Everybody feels a different type of strange  
But you don't throw it away

Everyday is change  
With a different problem to face  
Everybody feels a different type of strange  
But you don't throw it away
