

## Walls (You Changed)

Sick Puppies

Black hole to nowhere you're lost and you don't care  
But I'm still here fighting to breath  
Watching the world from a top your high tower  
A fool calling himself the king  
And I watched you change

Dead on arrival you say its survival  
A self preservation technique  
You lace your defenses, its stupid its senseless  
To turn into my enemy  
And I watched you change

When the walls come down  
You got what you wanted now didn't you  
You'll never break me down  
It's killing you now  
Killing you

You were devoted 'til your head exploded  
And vanished into the debris  
Counting your losses, discerning, dishonest  
You dealt in the wrong chemistry  
And I watched you change

When the walls come down  
You got what you wanted now didn't you  
You'll never break me down  
It's killing you now  
Killing you  
(Killing you)  
Killing you

And I watched you change  
Yeah I watched you change

When the walls come down  
You got what you wanted

When the walls come down  
You got what you wanted now didn't you  
You'll never break me down  
It's killing you now  
Killing you  
(Killing you)  
Killing you
