

# Sin Triangle

Sidney Gish

Got to work on my brain then I'm  
Crawling back to my grave and  
I'm certain that I'm gonna die this time  
No doubt is left inside my mind tonight  
So I'm just gonna wait for nausea to set in, I'm  
Peacing out at eleven, the  
Friendly girls are trying to comfort me as if  
I'm a depressed chick at a frat party

Two-faced bitches never lie  
And therefore I never lie  
Diagram this sin triangle for me tonight  
Because I don't know what to say  
A sickness by another name  
Wouldn't be sweet either but  
With luck, it would at least look much more tame

Let's see how personality works  
Bill Woodruff here has something on his mind  
He wants something  
In fact-

I've got to work on my face now, I'm  
Wearing shades when it's dark out  
But don't you worry I'm just being cool  
Like everybody else around this school  
And maybe I wanna see him  
But then again I'm an isolationist  
And on an accident, I'm like Japan  
Before they went and traded stuff to other lands

And two-faced bitches never lie  
And therefore I never lie  
Diagram this sin triangle:  
But the biblical kind and not sine  
I don't know what to say  
A sickness by another name  
Wouldn't be sweet either but  
With luck, it would at least, like, not suck

What do we mean when we talk about personality?  
What is your personality?  
It's the way you get along with other people around you  
And your changing environment  
You want certain things from other people in your environment  
The way you go about getting those things reveals your personality  
For example, did you ever want to go one place but the gang wanted to go somewhere else?  
What did you do?  
How set was your personality?  
Did you ever want, so much, to make a good impression on someone?  
What did you do?  
How accepted was your personality?  
Did you ever feel alone, out of place, when you wanted very much to be part of the group?  
What did you do?

Two-faced bitches never lie  
And therefore I never lie  
Diagram this sin triangle:  
But the biblical kind and not sine  
Because I don't know just what to say  
And a sickness by another name  
Wouldn't be sweet either but  
With luck, it would at least, like, not suck

And some bitches never lie  
Therefore I never lie  
Diagram this sin triangle for me tonight  
Because I don't know just what to say  
A sickness by another name  
Wouldn't be sweet either but  
With luck, it would at least look much more tame

Wouldn't be sweet either but  
With luck it would at least look much more tame
