

Have No Fear

Siena Root

In the dark, who knows where to turn?
For the true, this world holds no place
Make a vow, and get lies in return
Rearrange, mustn't live in a maze

We must change, universe comes a whole
Try to fly, be the spark in a fire
Have no fear, feed the light of your soul
No more games, always be live-wire

Take my hand, when the sky's turning red
Say good bye, to these years we were blind
We'll get by, there's a journey ahead
Time to leave, all those troubles behind
