

# Organic Intelligence

Siena Root

Would you care to let your eyes off the screen  
Or is your telephone smarter than you?  
Sell your soul and feed the machine  
Seems to me like a bitches brew

Livin' in a digital dream - artificial ain't pristine  
Just being ineffective - not retrospective  
Please accept our existence - or expect our resistance  
Not talkin' 'bout common sense - organic intelligence  
Don't you let your mind for free

Once you care to let your eyes off the screen  
You'll get a chance to start to wonder who's  
Floggin souls just to feed the machine

Livin' in a digital dream - artificial ain't pristine  
Just being ineffective - not retrospective  
Please accept our existence - or expect our resistance  
Nevermind common sense - organic intelligence  
Don't you let your mind for free
