

## Give It Time

Sierra Ferrell

I was going through the drawer at an old antique store  
When a note on a page caught my eye  
Words they were sad, made my insides feel bad  
Like it spoke from the man that I adore  
He was moving on he spent most of his nights gone  
And I knew our love was ending  
To this very day, I still get tears in my eyes for the words that he never said

Give it time, write some letters  
Give it time, you'll feel better  
Soon I will fade from your mind  
Give it time, no more sleepless nights  
Give it time, you'll find the one that's right  
You think that you still need me, give it time

And if you think that it won't last, you're probably just livin' in the past  
And if you need someone to help you get through the night  
Go out there, go ahead, find the light  
And if you need some place to go, you're with me we'll go slow  
To this very day, I still get tears in my eyes for the words that he never said

Give it time, write some letters  
Give it time, you'll feel better  
Soon I will fade from your mind  
Oh give it time, no more sleepless nights  
Give it time, you'll find the one that's right  
You think that you still need me, just give it time
