

Well the space between just will not do
I choose you, yes I choose you
Oh, it must be all of the things you do
Yes, it must be all of the things you do

Satellites, we play in our own spaces
We go all over the places
Soon to see each others faces
The satellites, we play in our own spaces
We go all over the places, soon to see each others faces

Well your love it could send me to the moon
Oh look out honey, yes we'll be there soon
So don't you dare go paint me a shade of blue
Just please be true, Yes please be true
And oh it must be all of the things that you do
Well it must be all of things you do

Satellites, we play in our own spaces
We go all over the places
Soon to see each others faces
The satellites, we play in our own spaces
We go all over the places, soon to see each others faces

Satellites, we play in our own spaces
We go all over the places
Soon to see each others faces
Well satellites, we play in our own spaces
We go all over the places, soon to see each others faces
