

## Wish You Well

Sierra Ferrell

Even if I'll never hear the words I'd hope you'd say  
Even if you never find the error in your ways  
I know that you try to hide behind the lies you tell  
Though you've hurt me, I still wish you well

Nothing could prepare me for the joy you took from me  
Stole away the person that I was when I was free  
Learning how to tell those lonesome feelings not to dwell  
Though you've hurt me, I still wish you well

And when you sleep, I hope you dream  
Someday dancing in the sun  
And when you wake and face the day  
Oh, the damage you have done

I could let it go and live to fight another day  
It's enough to know that you'll be saddled with the same  
And you'll have to live with what you did and face yourself  
Though you've hurt me, I still wish you well

And when you sleep I hope you dream  
Someday dancing in the sun  
And when you wake and face the day  
Oh, the damage you have done

I could let you rattle in the rafters of my brain  
Cry until my tears could fill the river with the rain  
But I finally found a way to break your dreadful spell  
Though you've hurt me, I still wish you well  
Though you've hurt me, I still wish you well
