

# Run From You

Sigma

October disappeared  
And I'm still stuck in June  
From the moment you left here  
I wish I was immune  
I'll stand out in the rain  
I'll wash you off my skin  
Swear I'll try anything

Try to make a warning sound  
Try to keep my feet on ground  
Try to stop my mind, I know it got away  
Everything has got so loud  
Try to scream, it won't come out  
When I fall asleep I'm stuck here wide awake

I run for you  
I need that use  
I stumble right back again  
I know it's cruel  
We draw these lines  
Like they're not [?]  
And stumble right back again  
For one last time  
I run for you

I run for you

It's getting criminal  
My chest don't feel the burn  
Let's try, be clinical  
Or else I'll never learn  
I drive at three AM  
I play my TV loud  
You creep back in my head  
Wish I could drown you out

Try to make a warning sound  
Try to keep my feet on ground  
Try to stop my mind, I know it got away  
Everything has got so loud  
Try to scream, it won't come out  
When I fall asleep I'm stuck here wide awake

I run for you  
I need that use  
I stumble right back again  
I know it's cruel  
We draw these lines  
Like they're not [?]  
And stumble right back again  
For one last time  
I run for you

I run, I run  
I run, I run  
I run, I run, I run, I run for  
I run, I run, I run, I run for

I run for you  
I run for you

I run for you  
I need that use  
We draw these lines
