

## Say It

Sigma

You're here so hear me out  
Just slow down  
Give a little something  
The clock is going round  
I hold out  
'Cause I'm feeling something

We're moving round each other  
Like we don't see another  
There's so much to discover

Say it do you want me now  
Say it do you need me now  
Well confess to me  
Confess to me  
Say it do you want me now  
Say it do you need me now  
Confess to me  
Confess to me

You know I have no doubts  
Right now  
We're just hesitating  
The moments we're allowed  
Come on  
I don't wanna stay here

We're moving round each other  
Like we don't see another  
There's so much to discover

You just say it  
Need you to say it, say it  
I'm calling out to you  
I'm calling out  
I'm calling out to you

I'm calling out to you
