

Let's get lost in an original sound
I heard a band that was better
Than the last one around
So take my time, my line, my beat down
I serve a God that doesn't judge me
By a new sound
Okay, honestly, it's coming too easy
I'm making' up an old used verse, chorus, key
This has not been done before
This hasn't been done before

That's it, get down, we're lookin' for
Some new ground
Gotta break through with a breackthrough
New sound
And that won't happen 'cause it's
Time to get down
Here's the tune, where's the truth
Inside, we found
It's almost, it's almost, it's almost, it's almost
It's almost over and I haven't said a word yet
That hasn't been done before
This hasn't been done before

Breakdown
Gotta have a breakdown
Build it up
Back to the verse and
It's alright to write a song that
Sounds like everyone else's song so

Let's get lost in an original sound
I heard a band that was better
Than the last one around
This hasn't been done before
This hasn't been done before
