

# My Mind

Silas

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams just to make it in the limelight  
And when the times right, I swear its my night  
When the times right, I swear it's my night

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams just to make it in the limelight  
And when the times right, I swear its my night  
When the times right, I swear it's my night

All alone, seeing everything  
I'm dreaming here, that's everyday  
This everything, I love no change  
You call my phone, so you play the game  
And you know my mind, so you lonely why?  
But I'll fold this time, wrote that shit feeling broke inside Anthony, where  
the fuck are you?  
It's been hard, so call the deacon too  
And you know what the fuck, what I mean, when I do  
When I seen everything, and I've seen it through you

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams and just to make it in the limelight  
And when the times right I swear its my night  
When the times right, I swear it's my night

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams and just to make it in the limelight  
And when the times right I swear its my night  
When the times right, I swear it's my night

Had to bounce one time, just to make a way  
Had to get my own, just to get some pay  
If I'm making sense, yes I'm making cents  
Bitch with my bars, to pay my rent

Fuck do you mean?  
Lost in my mind, toes to the ground, looking up to God Everything I seen, is  
everything I dream  
Said it two times so you know what I mean  
Fuck it, we so alone do you have a blessing on?  
I just I hope I make it, cause I know this world is fucking cold

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams just to make it in the limelight  
And when the times right, I swear its my night  
When the times right, I swear it's my night

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams just to make it in the limelight  
And when the times right, I swear its my night  
When the times right, I swear it's my night

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams just to make it in the limelight  
And when the times right, I swear its my night  
When the times right, I swear it's my night

When you gonna hear this I've been tripping on my mind like  
Got a couple dreams just to make it in the limelight  
And when the times right, I swear its my night  
When the times right, I swear it's my night
