

I Know...

Silent Drive

And I know the beauty of the light that lights up those eyes
And the three girls that create that light
And I know how hard it was to get the news and then have to make the calls
To everyone that loves your light
And I knew that we'd get through this together

And everything that you've gone through
All the chemo trips we took
All the signs friends made and stood on roofs
To show you that you were loved
More than any other was
But I knew you knew

And I know how much you loved the camping trips with endless friends and the kids
The nutcracker with Nora every year
And I knew that when I got the call to get down to the hospital
To say goodbye to you one more time
That you and I would get through this together

And I guess that I should have known
The lines would be hundreds long
The dedication your friends had to a one and only
To show you that you were loved
More than any other was
But I knew you knew

Sitting across the room from your amazing wife, she's your partner for life
I've never seen anyone hold someone's hand so tight
I knew it was the end when I got the call get Lennon back here right now
Hurry Bob, we've gotta drive I think the sun is going down

I knew you were loved more than any other was
I just want more fucking time
So we'll sing to the whole world
We will hold hands together
We will look at the sky and scream at it forever

He's my friend, he's my alibi
My accessory to the crime
A bond that will never die, till the end of time
Till the end of time

He's my friend, he's my alibi
My accessory to the crime
A bond that will never die, till the end of time
Till the end of time

He's my friend, he's my alibi
My accessory to the crime
A bond that will never die, till the end of time
Till the end of time
