

# Autopilot

Silverstein

I can't feel my feet again  
Trying to fly away  
Broke the chains around my neck  
But every time I get close, I feel a knot in my throat  
So I stay lost and I take off  
I'm on autopilot, turbulence inside my head  
Crash into the ocean, I'll be better when I'm dead  
Now it makes me wonder why I even breathe at all  
And I'm bracing for the fall

I'm weightless  
Cascading  
Counting down the seconds I'm awake  
So take it, take it, take-take it all the away  
Pulse racing  
Escaping  
Breaking out and rattling the cage  
Take it, take it, take-take it to my grave

Now you really think you have it all  
Bought me with a diamond and some alcohol  
I'll break it in a million pieces, I don't wanna see it again (See it again)  
No one ever calls you on your shit  
You're a fucking liar, you're a narcissist  
And you're gonna see I've been gentle, babe  
But now I'm gonna let it out

I'm weightless  
Cascading  
Counting down the seconds I'm awake  
So take it, take it, take-take it all the way  
Pulse racing  
Escaping  
Breaking out and rattling the cage  
Take it, take it, take-take it to my grave

Pull me aside, tell me how I've failed you  
I'll try to make it right like I always do  
Hear the sounds but never listen  
Look around but still I miss it  
This is the way it's always been  
Is this what you wanted?  
Is this what you wanted?  
Is it just like you thought out?  
And on the best days  
It's still a dark place  
And all my thoughts are going sideways  
Is this who you wanna be?  
Is this who you wanna be?

I'm weightless  
Cascading  
Counting down the seconds I'm awake  
So take it, take it, take-take it all the way  
Pulse racing  
Escaping  
Breaking out and rattling the cage

Take it, take it, take-take it to my grave

I'm weightless

Take it, take it, take-take it all the way

Take it, take it, take-take it to my grave
