

# Coming Down

Silverstein

High above the city street  
We're looking down at the space between  
You've got a dare for the devil in me  
What are we doing?  
I close my eyes and in the dark I'm free  
I know who I was but that's not me  
And let's not pretend you don't want me to leave  
What are we doing?

I've been falling so long  
I forgot what it feels like  
To be alright  
I've been falling so long  
Can't see me now

I've been falling so long  
I forgot what it feels like  
To be alright  
I've been falling so long  
Can't see me now  
I'm never coming down

Can't see me now  
I'm never coming down

Through the noise and flashing lights  
I felt the cold night air telling me new lies  
And let's not pretend you didn't realize  
What you were doing  
Too late, never the same  
Too many stories with nothing to say  
So let's not forget we're still drifting away  
What are we doing

I've been falling so long  
I forgot what it feels like  
To be alright  
I've been falling so long  
Can't see me now  
I'm never coming down

Can't see me now  
I'm never coming down  
Can't see me now  
I'm never coming down

This was never gonna be anything like love  
And all I had was always too much or not enough  
We were never gonna do anything but drown  
And all I know is I'm still high in the clouds

I'm never coming down

I've been falling so long  
I forgot what it feels like  
To be alright  
I've been falling so long

Can't see me now  
(I've been falling so long)

I've been falling so long  
I forgot what it feels like  
To be alright  
I've been falling so long  
Can't see me now  
I'm never coming down
