

# Negative Space

Silverstein

Change the focus, blur me in the background  
Shudder to think that I could ever be found  
Don't wanna be what the light hits last  
Find me lost in the abstract

You're not like me, we're perfect strangers  
You fly close to the sun, and I run from danger  
We're oil and water  
And the portrait never fits the frame, and I can't make it

Just give me a sign  
Meet me in the middle, meet me in the middle  
The look in your eyes  
Kills me just a little, meet me in the middle  
And find me  
In the negative space

The light dies slowly in a vacuum  
Burn the flash and lock me in a dark room  
I'm overexposed, but the picture's black  
Lose me in a lack of contrast

You're not like me, we're perfect strangers  
You fly close to the sun, and I run from danger  
We're oil and water  
And the portrait never fits the frame, and I can't make it

Just give me a sign  
Meet me in the middle, meet me in the middle  
The look in your eyes  
Kills me just a little, meet me in the middle  
And find me  
In the negative space

I'm gonna miss you when it's all gone  
I'm gonna miss you when it's all gone  
I'm gonna miss you when it's all gone  
Yeah, I'm gonna miss you when it's all gone

It's all gone  
When I get washed out and it's all a blur, and it's all a blur  
All gone  
When I get washed out, I can't fix it now, it's already burned

Give me a sign  
Meet me in the middle  
The look in your eyes  
Kills me just a little, meet me in the middle

Just give me a sign  
Meet me in the middle, meet me in the middle  
The look in your eyes  
Kills me just a little, meet me in the middle  
And find me  
In the negative space
