

# Whiplash

Silverstein

Late night, I try to focus on the blurred lights  
Neon signs and my hands are freezing  
Snow blind with my head down with the wind in my eyes  
This icy road stares back  
There's only so much hope when every place I go  
Reminds me I'll never get back home  
But there's no time, I look up into headlights  
The screeching tires seem to call my name

I deserve this, it's all true  
I'm burning up  
Everything you said hit me like a car wreck

Face down on the cold ground  
Slipping away as the past comes back  
I'm face down on the cold ground  
Slipping away as it fades to black

Whiplash, a thousand thoughts converge on impact  
A cry for help  
But there's no one left and the silence wins again  
I'm barely breathing as they call my name

I deserve this, it's all true  
I'm burning up  
Everything you said hit me like a car wreck

Face down on the cold ground  
Slipping away as the past comes back  
I'm face down on the cold ground  
Slipping away as it fades to black

But in the pouring rain  
I never felt like that, you said you felt the same  
Can't spend another day here  
I keep looking back as you're looking away

Everything you said hit me like a car wreck  
Everything-everything you said hit me like a car wreck  
I'm no better than bad luck  
Walk away while you can  
Walk away while you can  
Turn the page then nail the book shut  
Just walk away while you can  
Just walk away while you can  
Just walk away

Face down on the cold ground  
Slipping away as the past comes back  
I'm face down on the cold ground  
Slipping away as it fades to black

But in the pouring rain  
I never felt like that, you said you felt the same  
Can't spend another day here  
I keep looking back as you're looking away

Just walk away while you can  
Just walk away while you can
