NO FUTURE

SiM

Fight for your rights, don't confuse freedom with disorder
They're completely different thing
You should think it over and know the border
Cut the crap not to be caught in a trap, don't let me down
I'll never tap out, it's not enough to drag me to the ground

Let's break the system because there's no future
For the victims like I told ya
Can you really hold on, can you really hold on
Let's break the system because there's no future
For the victims like I told ya
Can you really hold on, no I can't hold on

Who need a reason to save the future
Who need a victim to save the future
Shame on you, you are always thinking of how to get a full erection
Go knock up a slut, break your butt just to win the next election
It's a beautiful world, beautiful people everywhere
Beautiful girls, beautiful nature everywhere

Who need a reason to save the future
For the victims like I told ya
Can you really hold on, can you really hold on
Let's break the system because there's no future
For the victims like I told ya
Can you really hold on, no I can't hold on
Who need a victim to save the future
We're sinking down
Who need a victim to save the future
Yes they came down
There's no future, no future
For you

Kill your boredom, build your kingdom, use your freedom
Use your freedom
It's a beautiful world, beautiful people everywhere
Beautiful girls, beautiful nature everywhere

Let's break the system because there's no future
For the victims like I told ya
Can you really hold on, can you really hold on
Let's break the system because there's no future
For the victims like I told ya
Can you really hold on, no I can't hold on
Who need a reason to save the future
Who need a reason to save the future
