We're All Alone

SiM

You are crying through the night "we are all alone"
When a star flashes through the sky
I'll sing a song that you'll never know
"Take me out to find something to pass the time"
"Don't go away, you're the only one who changed my mind"

Do you really care about me?
I didn't even tell you 3 percent of me
What I'm thinking, singing and why I feel sickening
You'll never know in a million years...
Yeah, we are all alone

If I cut my wrist and I'm bleeding
You'll never know until I call you
Am I still alive and breathing
You'll never know until I call you
"Take me out to find something to pass the time"
"Don't go away, you're the only one who changed my mind"

Do you really care about me?
I didn't even tell you 3 percent of me
What I'm thinking, singing and why I feel sickening
You'll never know in a million years...
Yeah, we are all alone

You're just a peeper who never sense shadow of the Reaper
Whatever happens, you'll never dig me

You're not the only one for me
Who need to understand my feelings
And I'm not the only one for you
Who can change your mind and give you meaning of life
So I told you that I hate all human beings
I don't know about you, you don't know about me
That's all, this is why I'm looking for someone
Who can make me say "we are not alone"
