

## Know You II

Simi

I like you but I need time  
I like you but I need space  
So why is it every night  
I need you back in my place  
Now that I know you  
All the places I can hold you  
But it don't feel like we're suppose to  
And you think that I would know this by now  
I give you green light  
Pull me closer baby skin tight  
But it never really seem right  
And you think that I would know this by now

Hol' up  
I think I really like you too much  
As e dey hot before I get lost, make I comport  
You make me feel naughty, naughty, naughty  
You know me I getty baggage  
Forget say me I package  
And me no wan take advantage  
Me no wan give you heartache  
You think that you know me  
If you only knew  
Puppy love, ko mi like Scooby dooby do  
Shoma sunmọ mi, jia sọrọ  
Don't know what to do

Oh my day oh  
How may months and days oh  
Until we finally let go  
I'll do it if you say so  
I say so

I like you but I need time  
I like you but I need space  
So why is it every night  
I need you back in my place  
Now that I know you  
All the places I can hold you  
But it don't feel like we're suppose to  
And you think that I would know this by now  
I give you green light  
Pull me closer baby skin tight  
But it never really seem right  
And you think that I would know this by now

I had to grow locks so you could pull on something  
God made you so I could trip on something (Trip)  
What made you wanna slip on something  
I know what's underneath at least undo the buttons  
But first  
Commot you eye glass make I see your eyes  
You see I came into your life when I was losing mine  
There's no formula for healing that doney come with time, yeah  
And you think that I would notice given into this fears  
What you say when you whisper into these ears  
Keep the faith oh we need to take a leap here

I'm being sincere  
You're on my mind  
What's on my mind is

Day oh  
How may months and days oh  
Until we finally let go  
I'll do it if you say so  
I say so

I like you but I need time  
I like you but I need space  
So why is it every night  
I need you back in my place  
Now that I know you (Know you)  
All the places I can hold you (All over your body)  
But it don't feel like we're suppose to (Baby we can slow it down)  
And you think that I would know this by now  
I give you green light  
Pull me closer baby skin tight  
But it never really seem right  
And you think that I would know this by now  
(Loud daa)

By now, by now, by now  
If you show me that you know me well  
I can show you that I know you too  
Baby hold me  
Just tonight don't you leave me lonely
