

First to the Last Kiss

Simon Webbe

I could never hate you
'Cause you were my life
Tell me what persuade you
To cut me like a knife
What happened to us lately
Where did I go wrong
I'm tryna work it all out
Now where do we belong

Well, sitting on my own
It's breakfast time
Your kisses at the door
This is goodbye

From the first to the last kiss
It couldn't get any better
If I could've done this
I should've done that
We could've been forever
From the first to the last kiss
Never say never
If I would've known this
I could've changed that
We would've stayed together

I always used to wake you
Only for your smile
When you eyes stopped shining, girl
Was I living in denial
Yeah, what happened to the dancing
The chilling of champagne
Your heart was getting colder
No more laughing in the rain, no

Now you're living on your own
Do I cross your mind
Is there anybody home
Deep down inside

From the first to the last kiss
It couldn't get any better
If I could've done this
I should've done that
We could've been forever
From the first to the last kiss
Never say never
If I would've known this
I could've changed that
We would've stayed together

I can feel one last parade
To resurrect the love we made
And we can fill those picture frames, oh baby
Maybe we'd choose our children's names

No longer on my own
It's breakfast time

My baby made it home
No more goodbye

From the first to the last kiss
It couldn't get any better
If I could've done this
I should've done that
We could've been forever
From the first to the last kiss
Never say never
If I would've known this
I could've changed that
We would've stayed together

I could never hate you
