

Strange Love

Simple Creatures

Give me that guitar
And throw me in a crowded room
She bit her lip and kissed me hard
Please drag me down the darkest night with you
Pose your friends and laugh a moment
Frozen at the bar
Catch your reflection in the glass
Try to forget just who you really are

Strange love
Don't let the madness change us
All of the good vibrations
Roll on for one more
It's a strange love
Lie on the floor with strangers
All of the good vibrations
Roll on for one more
Roll on for one more

Roll on for one more
Roll on for one more

Twenty dollar drinks
The smell of perfume in her bed
She traces lines across my skin
And leaves me dancing on the razor's edge
She straightens out her dress
And wipes the lipstick off her teeth
You're just a crater of yourself
And she's the fallen angel underneath

Strange love
Don't let the madness change us
All of the good vibrations
Roll on for one more
It's a strange love
Lie on the floor with strangers
All of the good vibrations
Roll on for one more
Roll on for one more

Roll on for one more
Roll on for one more

Roll on for one more
Roll on for one more

Strange love
Don't let the madness change us
All of the good vibrations
Roll on for one more
It's a strange love
Lie on the floor with strangers
All of the good vibrations
Roll on for one more
Roll on for one more

Pose your friends and laugh a moment
Frozen at the bar
Catch your reflection in the glass
Try to forget just who you really are
