

Barrowland Star

Simple Minds

Did we think those days would last forever?
And there, across the bridge, under the bold neon stars
We'd sacrifice ourselves for something better

Let's think about, let's think about it
You and me
No mistakes, no, no other way

I could feel the fever, hour coming nearer
Put our jackets on, the bad days were gone
The night was coming on to be Barrowland Stars
Trauma in our head was let go instead
And all we ever wanted was there to touch
All around us said "You'll be Barrowland Stars"

Did we think those would last forever?
Those broken circle one more time come together

Let's think about it, let's think about it
Let's think about it
You and me, you and me

Feel the fever, Barrowland Stars
Creeping nearer, Barrowland Stars
Blood was rushing, we were Barrowland Stars
Was no mistake, was no, no other way

I could feel the fever, hour coming nearer
Put our jackets on, the bad days were gone
The night was coming on to be Barrowland Stars
Trauma in our head was let go instead
And all we ever wanted was there to touch
All around us said "You'll be Barrowland Stars"

I could feel the fever, hour coming nearer
Put our jackets on, the bad days were gone
The night was coming on to be Barrowland Stars
Trauma in our head was let go instead
And all we ever wanted was there to touch
All around us said "You'll be Barrowland Stars"

Barrowland Star
Barrowland Star

Trauma in our head was let go instead
And all we ever wanted was there to touch
All around us said "You'll be Barrowland Stars"
I could feel the fever, hour coming nearer
Put our jackets on, the bad days were gone
The night was coming on to be Barrowland Stars
