

Honest Town

Simple Minds

Wounded, they say you got wounded
Say you're still haunted
Haunted by all this
Deep there, somewhere down deep there
It can still overbear
In ways so discreet
But there's one thing I'll point out you'll see
And I hope that you'll find these words comforting
When the light settles down here in Honest Town you'll see
There's still something between you and me
And when we turn on our ways back to honest days you'll find
There's still something between you and me
Feel it, I know you still feel it
Must I repeat it again
Till the healing is over
But there's one thing I want you to see
And I hope that you'll find these words comforting
When the light settles down here in Honest Town you'll see
There's still something between you and me
And when we turn on our way, back to honest days you'll find
There's still something between you and me
Cause when the light settles down here in Honest Town you'll see
There's still something between you and me
And when we turn on our ways back to honest days you'll find
There's still something between you and me
Something, still something
Something between, still something between you and me
Something, still something
Something between you and me
Something, still something
Something between you and me
