Simple Minds

Magic

Now I believe in forces

I need the truth, the reason why  
Was so amazed, such a lucky child  
And then something died  
Like everybody it hurt inside  
And I would walk to the city with my wounded pride  
But everybody is too busy and you're wondering why  
There's a hole inside  
I need a pill, not an alibi

Now it's all coming together  
And it breaks like a storm  
This is our kind of weather

'Cause now that I believe in magic  
I believe in your lips  
I believe things coming away  
Now I believe in forces  
I believe it's all said  
Nothing here can make me sway  
And now that I believe in magic  
Nothing can confound us  
Nothing can explain away  
Now I believe in forces  
I believe in your steps  
Taking me some other way

Lost inhibition, I'd lose my mind  
Reality was no friend of mine  
So I thought I knew  
But everybody's just kidding you  
And I remember when I stumbled on a slippery stone  
I was in the jungle and I couldn't get home  
Was in a zoo  
Without a single clue

Now it's all coming together  
And it breaks like a storm  
This is our kind of weather

'Cause now that I believe in magic  
I believe in forces

I believe in magic  
I believe in your lips  
I believe things coming away  
Now I believe in forces  
I believe it's all said  
Nothing here can make me sway  
And now that I believe in magic  
Nothing can confound us  
Nothing can explain away  
Now I believe in forces  
I believe in your steps  
Taking me some other way

I believe in magic  
I believe in forces
