

Everyday I wake up feels like any other  
You're the one who sets the test and I need you like no other  
Through summer time, winter time, was wonder time when you were there

Was you who made me reach out, you who made me see  
You're the one who turned this game into reality  
Tryna find a state of mind some future time and we're still there

And still I'm thinking and still I see  
I still belong hoping endlessly  
Through summer time, winter time, was wonder time when you were there

And I feel nostalgic  
I still feel this heart beat  
Reach out for the best always  
Look out for the signs  
Turn my back, close my eyes  
On all that makes me blind  
Go back to wonder times

Your world of broken pieces, memories go on  
Everyday is another chance, every dream is a song  
Another time, a future time, a wonder time and we'll go there

Still I'm thinking there's so much more to see  
There's no place we don't belong moving endlessly  
Through summer time, winter time, this wonder time and we're still there

Still feel nostalgic  
And yet there's so much happening  
Reach out for the best always  
Look out for the signs  
Turn my back, close my eyes  
On all that makes me blind  
Go back to wonder times  
Go back to wonder times  
Wonder time  
We're still there

I still remember  
I still recall  
I still remember  
Going back to wonder time  
Wonder time  
Go back to wonder time  
Wonder time  
I still remember  
I still recall  
Way back in wonder time  
Oh wonder time
