

Better With You

Simply Red

I didn't know, what I was doing
What you were feeling, and when did we know?
I recall a crowded smoky room
And you and me had had enough of the fumes

Better with you, honey, for the things that we'll never regret
Better with you, honey, as we did the things we'll never forget
Better with you, better with you
Better with you, better with you, always

It's so good to be together
It's so good to be together
It's so good to be together

You didn't show, so then my heart was aching
Where did you go? You seemed lost for sure
But I recalled the bar you took me in
And there you were standing with your gin-soaked friends

Better with you, babe, before the booze got you out of your head
Better with you, honey, for the things that we'll never regret
Better with you, better with you
Better with you, better with you, always

It's so good to be together
It's so good to be together
It's so good to be together (Better with you)
It's so good to be together (Better with you)
It's so good to be together (Better with you)
It's so good to be together (Better with you)
It's so good to be together
