## Smile

## **Simply Red**

You make me smile glow and shine You make me glad to be alive With love it's easy to survive

The girl that I lost when I was blue Has confirmed my heart grows stronger When there's you

'Cause you make me smile You make me smile

True love won't find a better way Fake love best plan its getaway New love won't find a better place to stay

The woman that I love you always knew My heart loves longer and stronger when there's you

The color of my blood is truly justified That was me it was me I never lied My blood flows through you And my heart goes to you when you cried

It's no good to bluff or never wonder why Who to be, who to be, I've never tried It's enough to know you And to love you baby is my pride Loving you forever is a must And for now on my love will never be denied
