

# System

Sinead Harnett

Yeah, yeah, just a little  
A little bit higher please

Early up in the morning  
I should really be going  
Tryna savour the moment  
And the rain it could be falling  
'Cause you're the sunshine on my body  
My turn up after the party, extacy

When you touch my skin, baby  
It's the sweetest sin  
Oh, the way you feel (wo-wo-wow)  
Better bet you better than  
Any other that I ever wanted then

Got you in my system  
It fills me with a question now  
Could you be the answer to me?  
And I just wanna get permission  
To show you something different  
There's every possibility we're falling in love  
We're falling in love  
We're falling in la-la-la-love  
We're falling in love

Ever such a sweet feeling  
Honey dew to the ceiling  
Had a taste and I'm feinding  
For your sexual healing, yeah  
'Cause you got me like no other  
We could be each others fantasy

When you touch my skin, baby  
It's the sweetest sin  
Oh, the way you feel (wo-wo-wow)  
Better bet you better than  
Any other that I ever wanted then

Got you in my system  
It fills me with a question now  
Could you be the answer to me?  
And I just wanna get permission  
To show you something different  
There's every possibility we're falling in love  
We're falling in love  
We're falling in la-la-la-love  
We're falling in love

Got you in my system  
It fills me with a question now  
Could you be the answer to me?  
And I just wanna get permission  
To show you something different  
There's every possibility we're falling in love  
We're falling in love  
We're falling in la-la-la-love

We're falling in love

Tell you what you wanna know  
I'm not afraid to bear my soul  
Because if love is where you wanna go  
Baby, I'm gonna take you home
