Faster Than Light

Sinner Faces come and go The bodies are always the same They're speakin' in unctuous words But they cheat - always the same Conservative shorthairs Won't believe what we're doin' Their numbers up and our generation will rule it Down down Don't let 'em bring you down We won't bring back their old time We strike back again Faster than the light We speed at night Faster than the light Run for your life Fight for the same reasons Establishing our rights We're out in the cold Got nothing to lose than a lonely life Tyrranical blockheads busting our arrogance [Solo: Mathias]

Sinner
