## **Until It Hurts**

To my sweet surprise You just said nothing It feels like a ritual To make believe The words keep falling From your mouth Yes, I know it's hard Not to cross the line Reach out and scream We take it as it's natural Situation is horrible The more we wait There's less belief In sweet salvation Until it hurts you see Until it hurts I'll be the one You say that you can't take no more It just keeps getting worse I count the words Until it hurts Until it hurts you see Until it hurts I'll be the one You say that you can't take no more It just keeps getting worse I count the words Until it hurts
