

Infinite & Endless

Sir Rosevelt

Looking up at the stars in the sky
Tell me what do you see?
All the lights burning holes in the darkness
They lead you to me
I see the million miles that stand in our way
But that could never keep me from you
If there's one thing in this world you can believe in
There's nothing I wouldn't do

You and I are infinite and endless
You and I are infinite and endless
You and I are infinite and endless
You and I are infinite and endless

Staring deep into this heart made of fire
Can you see it beating to me?
Your gravity has got a hold on me baby
And I don't ever wanna be free

You and I are infinite and endless
You and I are infinite and endless

Infinite and endless
Infinite and endless

Oh-whoa, we're never gonna die
Oh-whoa, we're never gonna die
Oh-whoa, we're never gonna die
We're never gonna die

Infinite and endless
Infinite and endless
Infinite and endless
Infinite and endless
