

## Same Space?

SiR

Tainted view of us  
I find it hard to see  
Anything that was  
Good in you and me  
I hate it when you go  
I'm happy when you leave  
I go through withdrawals  
When I draw you close to me

Is this my destiny?  
To set you free  
Is this my destiny  
Lying here with me?  
Giving the best of me  
Can't you see?  
I've got more love to share  
Maybe we should stay right here

In the same space  
Look for different results in the space  
How we gonna look for different results in the same space?  
Oh how, if we're in the same space?

A million reasons why  
We could've said goodbye  
But my heart can't deny  
How it feels when you're by my side  
If we get any closer now  
We won't have to dream  
The feelings that we shared  
Already reign supreme, oh

Is this my destiny  
To set you free (Set you free)  
Is this my destiny  
Lying here with me (Lying here with me)  
Giving the best of me  
Can't you see?  
I've got more love to share (Got more love to share)  
Baby, we can stay right here

In the same space  
Look for different results in the space  
How we gonna look for different results in the same space?  
Oh how, if we're in the same space?  
Oh how, if we're in the same space?
