

Summer in November

SiR

Summer in November
Summer in November
Summer in November
Summer in November

Brought some action to the show
Tryna learn me what you know
Sugar sweet just how I like
Please appease my appetite
Lit a candle for the vibe
Playin' Marvin for the mood
Gettin' ready for the ride

Never felt a love like yours
Now you're tearing me apart
Doesn't matter where you are
When's it good to tame your heart?

You're summer in November, darlin'
You're something to remember, darlin'
Oh I love the look in your eyes
As the temperature rises and rises and rises and rises

My Sahara in the snow
Singing softer than the wind
I don't know how far we go
I don't know where we begin
But you don't care about the flame
You don't care about my name
If I didn't have a dime
You would care for me the same

Never felt a love like yours
Now you're tearing me apart
Doesn't matter where you are
When's it good to tame your heart?

You're summer in November, darlin'
You're something to remember, darlin'
Oh I love the look in your eyes
As the temperature rises and rises and rises and rises

Summer in November
Summer in November
Summer in November
Summer in November
