

## Fall Off The Map

Sister Hazel

This side of road that no-one else knows  
Let's ride a wave that never been rode  
With the radio playing and the heartbreaker screaming  
Baby we'll drown out that little voice of reason  
Let's push and push until we take it to the limits  
Let's give in to this red hot minute

Let's fall off the map and just disappear  
Let the wild wind be our spirit wheel  
We got comforter and kisses to spill  
And baby we can drive  
Till we're out of sight  
Let's get lost tonight

No cars coming by anytime soon  
Yeah let's go a headlight and drive by the moon  
Miles away from a city limit sign  
Tell me your dreams and I will tell you about mine  
There's nowhere to go but we're covering ground  
If we do this right we will never get found

Let's fall off the map and just disappear  
Let the wild wind be our spirit wheel  
We got comforter and kisses to spill  
And baby we can drive  
Till we're out of sight  
Let's get lost tonight

There's a million stars burning in the sky  
The one fell down and we'll chase it tonight

Let's fall off the map and just disappear  
Let the wild wind be our spirit wheel  
We got comforter and kisses to spill  
And baby we can drive  
Till we're out of sight  
We can drive  
Till we're out of sight  
Let's get lost tonight
