

Whoa-oh

Sometimes I feel  
Like we're on a different planet  
Let's get out of here  
Let's find a different canvas  
Where we can both lose control  
Both be alone together  
Drifting, so far from here

Gravitational pull  
Now my orbit's got you  
We'll be taking off soon  
It's you and I versus the U-N-I-verse

Sometimes I feel like we're floating alone with the stars  
You and I versus the U-N-I-verse  
Two UFOs, only we really know where we are  
You and I versus the U-N-I-verse

I can't get enough of all this love  
And cosmic dust is rushing  
Through my, through my veins  
Just like gamma, gamma rays  
We were something cursed  
When we were down on it at first  
We thought it's us against the world  
But baby it's you and I versus the U-N-I-verse

Sometimes I feel like we're floating alone with the stars  
You and I versus the U-N-I-verse  
Two UFOs, only we really know where we are  
You and I versus the U-N-I-verse

Gravitational pull  
Now my orbit's got you  
We'll be taking off soon  
Gravitational pull  
Now my orbit's got you  
We'll be taking off soon  
It's you and I versus the U-N-I-verse

Sometimes I feel like we're floating alone with the stars  
You and I versus the U-N-I-verse  
Two UFOs, only we really know where we are  
You and I versus the U-N-I-verse  
Sometimes I feel like we're floating alone with the stars  
It's you and I versus the U-N-I-verse  
Two UFOs and we don't really know where we are  
You and I versus the U-N-I-verse
