Make The World Safe

Sizzla

There can't be no progress
Where there is violence
Can't be of knowledge when everyone is silent
Too much of gang war and media's x-rated
City's going to knock of business dealers
I don't see why we can't help ourselves
Get this feeling to destroy someone or something else
Are you for the people? Are you for the love?
I'm asking too much evil keep passing no more

Let us make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world

Keep the surroundings clean and make the people happy
This is your work, you make it what you want it to be
Know you try some words whenever time you're talking to me
[?] it really doesn't matter to me
The people all a system of the white colony
Can't make a dollar and the leaders ain't no one to follow
It only takes you to make a difference
Faithful persons don't need false pretence

Let us make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world

Hear me holy Most High
Please hear, can you witness
Nuff a get up and a go a church every day
And don't have no love and forgiveness, hey
Apple of than eye, good over evil
Then why you get up every day and want to hurt the people

Let us make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world, safe for the children
Make the world, let us make the world
Let us make the world

There can't be no progress
Where there is violence
Can't be of knowledge when everyone is silent
Too much of gang war and media's x-rated

City's going to knock of business dealers
I don't see why we can't help ourselves
Get this feeling to destroy someone or something else
Are you for the people? Are you for the love?
I'm asking too much evil keep passing no more
