

Blessings flow  
Hate them all  
Heart of mine  
Send them up  
City life, city rough  
Are we survivors?  
Put your lighters up

I look to Jah for my sole protection  
Just can't afford to lose my sense of direction  
Make a stand, the sky is blue  
It 'bout the things we have gone through, hey

I gotta puff on some herbs and settle my nerves  
After all that's going on all over the world  
I gotta puff on some herbs and settle my nerves  
After all that's going on all over the world

People are dying, children crying  
What the heck's going on?  
People in turmoil in the business world and they act like they've done nothing wrong  
Armageddon in a Babylon, that's what it's coming to  
And them evil plans from, oh, so long  
But what can the people do?  
Do something good, do something great  
Do something really big  
Do something, any little thing  
Or just to make other people live  
Gotta make it good, gotta make it right  
No time for sitting around  
I can't take the stress no more

I gotta puff on some herbs and settle my nerves  
After all that's going on all over the world  
I gotta puff on some herbs and settle my nerves  
After all that's going on all over the world

Pandemic  
Damn, check it  
And who'll make it?  
Watch how you step it  
Everyone deserve the best  
The people has a lotta stress  
The system is such a mess  
Corruption and violence in the press

Oh, gotta make my way  
Whoa, this is what I say

Puff on some herbs and settle my nerves  
After all that's going on all over the world  
I gotta puff on some herbs and settle my nerves  
After all that's going on all over the world
