It wasn't nice up to where we grow
Sleepless nights to the moon explore
System made us so confuse
When yo listen to the radio it's just bad news
People switch from the get back tape
Now a days everybody feel so stress
Ain't no one looking out for the poor
No, no, anymore

I ready rich but yet so mean
So they conge my yard, so the black they scheme
Ask for the help just to wait and see
So it force ghetto youth fi go tek the machine
There's no time let's start and shine
People from yo don't feel your pain
Why you keeping for your self
When people need help

We don't know what else to say
Our children lock the potentiality
Wid the voice of God for the ship to sink
Difficult times but pass the test
System never understand you well
They sending you to hell

I ready rich but yet so mean
So they conge my yard, so the black they scheme
Ask for the help just to wait and see
So it force ghetto youth fi go tek the machine
There's no time let's start and shine
People from yo don't feel your pain
Why you keeping for your self
When people need help
